

Installation

Before installing XCPT, it is a good idea to read the Read Me information found on the XCPT Installation Disk or open up your web browser and go to: <http://office.xcpt.com/readme.htm>. If you have any problems navigating through the installation, please call our 24 x 7 Technical Support Desk at 1-800-962- 2846.

1. Insert the XCPT Installation CD
2. XCPT will automatically check to see if Microsoft .Net 2.0 is installed on your computer.
 - a. If you already have Microsoft .Net 2.0, the XCPT installer will begin and you can move on to Step 3.
 - b. If you do not have Microsoft.Net 2.0, the XCPT .NET Framework Installation Dialog will open and tell you that you need to install it.
 - i. If you're connected to the internet, click on OK to download and follow the instructions to run the installation.
 - ii. If you don't have internet access, the software can be found on the XCPT installation CD in the \DotNet folder. Double-click on the dontnetfx.exe file to install the .Net redistributable package. After installing .Net 2.0, eject the XCPT Installation Disk and reinsert it. The installer will begin and you can move on to Step 3.
3. Single-click on XCPT Software in the Installer Dialog. Follow the instructions for installation. Click on Finish to finish the software installation.
4. Single-click on XCPT Graphics in the Installer Dialog. (This may take some time to load due to the large graphic content) Follow the instructions for installation. All components should be checked on the components checklist. Click on Finish to finish the components installation.
5. Single-click on Documentation to view training documentation.

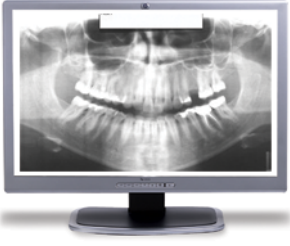

Congratulations! Your new XCPT software is installed and ready to use.

Networking for New Users

We suggest that XCPT be networked by an experienced computer operator. If you feel uncomfortable at all with networking, please call our 24 x 7 Technical Support Desk at 1-800-962-2846, or have your IT person network XCPT for you.

1. Install XCPT on a computer.
2. Create a new folder named XCPT on a mapped Network Drive.
3. Copy the Patients and Stamps folders from the XCPT folder on the C: Drive and paste them into the newly created XCPT folder on the appropriate mapped Network Drive.
4. As you install XCPT on each computer that you would like to be networked with XCPT, set up paths and networks in the XCPT Application:
 - a. Open the XCPT Application
 - b. Close the Patient Browser
 - c. Click on Setup from the Main Menu
 - d. Click on Paths and Networks
 - e. If you pasted Patients and Stamps folders into a new folder called XCPT on the mapped drive, simply change only the c: to the appropriate drive letter: in Patients Path:, Stamps Path:, Address Book Path:, and Business Card Path: leaving the path information in place. If you pasted Patients and Stamps folders into another folder on the mapped drive, browse to the folders on the appropriate mapped drive and click OK or type in the path information.
 - f. Click on Save Remote Default
 - g. Click on OK
 - h. Open the Patient Browser by clicking top left toolbar button Brows and check to see that it says Patients Folders on the Networked Drive. If it doesn't, then there is an error. Please contact Technical Support.

Networking New Graphics Information for Existing Networked Users

If you have upgraded from an older version of XCPT to Version 1.19, you will need to copy and paste the new graphics information into your network.

1. Install XCPT on each networked computer.
2. Copy the Stamps folder from the XCPT folder on the C: Drive on one of the computers and paste it into the XCPT folder or other appropriate folder on the appropriate mapped Network Drive.
3. Open the XCPT Application
4. Check to see that the new graphics can be found in the Galleries and Control Panel
