Read what our customers are saying...

"As a general dentist, the XCPT treatment planning program has been an immensely, effective tool in communicating comprehensive dentistry to our patients and referring specialists. Due to the visual aspect of a patient seeing the treatment plan on their own radiograph, patients understand and retain the information we are presenting to them. It has directly impacted the acceptance of Implant Dentistry in our practice. With the interdisciplinary nature of treating complex restorative cases, the XCPT method creates concise visual customized treatment plans to share with specialists in more detail and with greater ease than ever before. Best of all, with all its advanced technology, XCPT was easy to implement and use in our practice!" - Shanaka L. Weerasooriya, DMD, Englewood, FL

*"XCPT's software is amazing! I love it! My referring guys love it and I couldn't go without it!"
- Max Miller, DDS, Quebec, Canada*
